

THE COMPLETE GUIDE FOR YOUR CLINIC

Your clinic, calm and organized.

Patients, appointments, consultations, prescriptions, pharmacy and reports — one quiet, modern system built for Indian dental and general clinics, at a price that makes sense.

 Dental & general clinics

 Pharmacy & inventory included

 Beautiful branded PDF prescriptions

 Reports & doctor analytics

 Multiple branches, one login

 Laptop · tablet · phone

WHY KLIVIA

From paper registers to one calm screen

Most clinics still run on paper files, a diary for appointments and handwritten prescriptions. Records get lost, reception scrambles, stock runs out mid-treatment, and nobody sees the full picture. Klivia replaces all of it — without the learning curve.

Before Klivia

Patient files in a cupboard · appointments in a diary · handwritten prescriptions that pharmacies squint at · no warning when medicines run low · month-end counting by hand · a new receptionist takes weeks to train.

With Klivia

Any patient found in one search · a live waiting room the whole team sees · one-tap branded PDF prescriptions · stock that warns before it runs out · a dashboard that counts everything for you · new staff learn it the same morning.

Built for how Indian clinics actually work

Dose patterns doctors really write (1-0-1, after food) · intake forms modelled on real Kerala clinic paper forms · prices in rupees · WhatsApp support in your language · works fine on the clinic's existing laptop and your phone.

Honest plans, no hidden add-ons

No per-patient fees, no setup costs, no surprise charges. Solo covers a single doctor's daily essentials; **Clinic** adds the team features and the full pharmacy & inventory module; **Growth** adds multiple branches.

ROLES

Everyone sees exactly what they need

Admin

Runs the clinic: staff, settings, reports, billing. An owner who also treats patients is simply Admin + Doctor.

Doctor

Sees their day, their waiting patients, records consultations and prescriptions.

Receptionist

Front desk: registers patients, books appointments, checks people in, manages stock.

Every part of your clinic, covered

Ten modules, one login. Here's what each one does and exactly how your team uses it.

01 Dashboard

The day at a glance — different for each role

WHAT IT DOES

- ✓ Today's appointments and the live waiting-room count
- ✓ Doctors see *their* queue; admins see the whole clinic
- ✓ 14-day appointment trend and status charts
- ✓ 30-day pulse: new patients, completed visits, cancellations, completion rate
- ✓ Per-doctor performance bars — booked vs completed

HOW YOUR TEAM USES IT

- 1 Open Klivia in the morning — the day is already laid out
- 2 Check the waiting room count between patients
- 3 Owners glance at the 30-day pulse over chai — no counting

02 Patients

Register in 20 seconds · every record one search away

WHAT IT DOES

- ✓ Register with just a name and phone — details can come later
- ✓ Automatic clinic numbers (P-000482) like your paper files
- ✓ Instant search by name or phone
- ✓ Full patient record: contacts, medical conditions, visit timeline
- ✓ Every past diagnosis, vitals and prescription in one scroll
- ✓ Edit details any time — reception typos are a daily reality
- ✓ Printable intake forms: 🦷 dental & 🩺 general, pre-filled with the patient's details and your clinic letterhead

HOW YOUR TEAM USES IT

- 1 New patient walks in → Patients → Register → name + phone → Save
- 2 Returning patient? Type three letters of their name — found
- 3 Click the patient → their whole history opens
- 4 Print the intake form; the patient ticks the medical checklist and signs consent in the waiting room; the doctor fills the clinical sections during examination

03

Appointments & waiting room

Book · check in · treat — the heartbeat of the clinic

WHAT IT DOES

- ✓ Book in seconds: search patient, pick doctor, pick time
- ✓ Day navigator with a beautiful calendar — jump to any date
- ✓ Live statuses: Scheduled → Waiting → In progress → Completed
- ✓ One-tap **Check in** — the doctor instantly sees who's waiting
- ✓ Filter by doctor or status; "My patients only" for doctors
- ✓ Automatic reminders for tomorrow's appointments

HOW YOUR TEAM USES IT

- 1 Reception books the visit while the patient is still on the phone
- 2 Patient arrives → press Check in → doctor gets a notification
- 3 Doctor opens the waiting patient and starts the consultation
- 4 Status flips to Completed automatically when the visit is saved

04

Consultations & prescriptions

Diagnosis, vitals and a designer PDF in one tap

WHAT IT DOES

- ✓ Record diagnosis, treatment notes and vitals (BP, pulse, temp, weight)
- ✓ Medicine names auto-suggested from **your own pharmacy stock**
- ✓ One-tap dose chips the Indian way: 1-0-0, 1-0-1, 1-1-1, 0-0-1
- ✓ Timing chips: after food, before food, at bedtime, with warm water
- ✓ Beautiful branded PDF prescription — your clinic name, letterhead and doctor's signature line
- ✓ Every consultation lands in the patient's history automatically

HOW YOUR TEAM USES IT

- 1 Doctor taps the waiting patient → Consult
- 2 Types the diagnosis; vitals take ten seconds
- 3 Adds medicines — three taps per line with the chips
- 4 Save & complete → prescription PDF is ready to print or share

Why the PDF matters

The prescription is the paper your patient carries to the pharmacy and keeps at home — it's your clinic's business card. Klivia's prescriptions look like they came from a premium hospital, with your name on top.

05

Pharmacy & inventory

Never run out mid-treatment again · Clinic plan & above

WHAT IT DOES

- ✓ Track medicines, consumables (gloves, cartridges) and equipment
- ✓ Each item: unit, price, stock count, reorder level, expiry date
- ✓ **Low stock rises to the top** — with a red chip you can't miss
- ✓ Expiring-soon warnings (60 days ahead) so nothing is wasted
- ✓ ± Stock in/out with a tap — counts can never go below zero
- ✓ Prescriptions suggest medicine names from this same shelf, so spelling always matches what you actually stock
- ✓ Doctors can see stock too — they never prescribe what you don't have

HOW YOUR TEAM USES IT

- 1 Add your medicines once: name, unit, opening stock, reorder level
- 2 Supplier delivers? + Stock in with the quantity
- 3 Dispense or use stock? – Stock out
- 4 Every morning, the top of the list IS your purchase list

06

Reports & analytics

Know your practice — download and share as PDF

WHAT IT DOES

- ✓ Patients over time and new-patient growth
- ✓ Busiest days and appointment status mix
- ✓ Per-doctor performance: booked vs completed visits
- ✓ One-click **Download PDF** — print it or send it to a partner

HOW YOUR TEAM USES IT

- 1 Open Reports at month end
- 2 See which days need a second doctor
- 3 Download the PDF for your records or your partners

07

Staff & team

Invite by email — they're working in minutes

WHAT IT DOES

- ✓ Invite doctors and receptionists by email — they set their own password
- ✓ Or hand them a temporary password in person; both work
- ✓ Combine roles: a partner who treats patients = Admin + Doctor
- ✓ **Visiting doctors:** one account works across many clinics — your clinic simply attaches to their existing login
- ✓ Resend invites any time; deactivate staff who leave

HOW YOUR TEAM USES IT

- 1 Staff → Add staff member → their email + role
- 2 They get a branded email → choose a password → they're in
- 3 Their dashboard shows only what their role needs

08

Notifications & reminders

The bell that means nothing gets missed

WHAT IT DOES

- ✓ Doctors are notified the moment a booking is made for them
- ✓ Check-in alerts — "your patient is waiting"
- ✓ Automatic reminders for appointments in the next 24 hours
- ✓ Billing updates land here too — payment confirmations, plan changes

HOW YOUR TEAM USES IT

- 1 Watch the bell badge — tap to see what's new
- 2 Mark all read when you're caught up

09

Clinic settings & templates

Your letterhead, your forms — set once, used everywhere

WHAT IT DOES

- ✓ Clinic name, phone and address — printed on every prescription and intake form automatically
- ✓ Choose your default intake template: 🦷 dental (oral examination, ortho findings) or 🩺 general (vitals, systemic examination)
- ✓ Both templates stay available; your choice simply leads

HOW YOUR TEAM USES IT

- 1 Settings → fill your clinic profile once
- 2 Pick your template — done; every printout now carries your letterhead

10

Multiple clinics & branches

Grow without growing the chaos (Growth plan)

WHAT IT DOES

- ✓ Open a second branch or a new practice under the same login
- ✓ Each clinic's patients, staff, stock and billing stay fully separate
- ✓ Switch clinics from the sidebar in one tap
- ✓ "My clinics" page shows your whole structure at a glance

HOW YOUR TEAM USES IT

- 1 Click your clinic's name → + New clinic
- 2 Name it — Klivia builds it in seconds
- 3 Invite that branch's team; switch between branches any time

Your data is safe — and it's yours

Every clinic's data is isolated at the core — it is architecturally impossible for another clinic to read your records. Passwords are stored only as secure one-way hashes. We never sell data or show ads. You can export your records any time — they belong to you.

PRICING

Simple, honest pricing

Every feature on every plan — you pay for team size, never for modules. Prices in Indian Rupees. Pay yearly and get **2 months free**.

Start free for 14 days — no credit card

Every clinic starts with a free trial including full Clinic-tier features. Choose a plan when you're ready. Switch plans any time. Cancel any time — and your data is always exportable.

Questions clinics ask us

Is my patient data safe?

Yes — per-clinic isolation at the database core, hashed passwords, no data selling, no ads.

Can we move from paper or another software?

Start fresh in minutes; on Growth we help migrate your existing records.

The owner isn't a doctor — does that work?

Yes. Owners manage; only people with the Doctor role appear in the booking list.

Do we need to install anything?

No. Klivia runs in the browser on your existing laptop, tablet or phone.

GETTING STARTED

Up and running in three steps

1 • Create your clinic

Register with your name, email and clinic name. You're the Admin. Free 14-day trial, no card.

2 • Invite your team

Add doctors and reception by email — they set their own password and sign in.

3 • See your first patient

Register a patient, book, check in, consult. That's the whole loop — you'll know it in a morning.

Your clinic, calm and organized — starting today.

Start your free 14-day trial in two minutes. Bring your whole team. We'll personally help you get set up — in your language.
